## Planning to spend a long day at the area's parks or perhaps a drive to the coast for a fishing trip?

Several parks have kennels available for day visits. I've included links to their information below. Note that most require you to bring your own food and return during the day to walk your dogs, as they don't provide that service.

I've also included a few "doggy daycare" services and in-home pet-sitters that may be of interest, especially if you plan to visit attractions without boarding kennels.

Note that I have not used any of these services personally, and thus do not endorse any of them. This list is provided for information only. You should always check the premises and interview caregivers before leaving your pet.
